We request your assistance in preparing these summaries. Attached with this memorandum are written instructions and an Excel workbook that contains separate worksheets for each of the items shown above. I have also attached last year’s capsule of college data worksheet and request that you also review and update it.

Note that formula cells and information submitted last year are in locked cells. If you have a need to change a cell please let me know.
I will provide the “Summary of State Appropriations Worksheet” after the Senate Finance committee releases the appropriations bill. The completed worksheets must be returned by Monday, May 1.

This due date will ensure that we have sufficient time to complete and mail the budget document book to individual board members before their June meeting. Please note that budget hearings with Dr. Sorensen have been scheduled the week of this due date. The Budget Office must have presentation materials two full days before each hearing. The Regional Campuses and Continuing Education Office must receive presentation materials by Friday, April 28, 2006.

Should you have any questions or need additional clarification, please contact me at 803-777-1967 or by email. Specific instructions and the Excel workbooks for the development of your campus’s line item budget allocations for all ‘A’ funds will be issued in early June with a completion date at the beginning of July.
